

Real Analysis, 2010, Halsey L. Royden, Patrick Fitzpatrick, 0135113555,
9780135113554, Prentice Hall, 2010

This text is designed for graduate-level courses in real analysis. Real Analysis, Fourth Edition, covers the basic material that every graduate student should know in the classical theory of functions of a real variable, measure and integration theory, and some of the more important and elementary topics in general topology and normed linear space theory. This text assumes a general background in undergraduate mathematics and familiarity with the material covered in an undergraduate course on the fundamental concepts of analysis. Patrick Fitzpatrick of the University of Maryland College Park spearheaded this revision of Halsey Royden's classic text.
